Hi Kiran, Kunal

FYI. Note of thanks from Stefan.

I would like to thank everyone involved in design to deploy of our Coco App so far. I know it was tough to give quick responses to the dynamic nature of this COSY programme, but overall we had avoided any escalations and instead brought in appreciations. This could not have been possible without the support from each one of our team members. Please include if I have missed anyone.

Thanks

**Madhu Varrier**

**Subject:** BIG THANK YOU for successful Go-Lives in APAC and ANZ

Dear all,

this time little late but I don't want to miss to send a **BIG THANK YOU** to everyone who contributed to make to Go-Lives in ANZ and for the first ROW group in APAC a success. Not only given the huge number of countries but also due to new functionality with Coco/Cosy it was quite a challenge and a big effort to put everything in place on time but you made it.

Even though it was again a great team work my special thanks goes to the whole Data Migration team for managing all the consent loads and the multiple data adjustment requests from the countries as well to Mathi for the untiring adjustments to country territories and whitelists.

Meanwhile also the region confirmed the major teething problems for all countries are solved with the exception of India. Here we will take some special measures with the kind help of the Capgemini team to bring also their data into the right shape and we will continue with follow-up sessions on DMAC, Align and Free-text to foster the knowledge in the systems.

Guys, I'm really proud of being part of this team.

Mit freundlichen Grüßen / Best regards,

**Stefan Schmidt**
